

ZATU

The Zones Ateliers (ZAs) are an interdisciplinary network of researches, involving several institutes and organisms. ZAs are supported by the National Center for Scientific Research (CNRS) since 2000. The ZAs conduct long term fundamental and applied researches, in the field of environmental sciences, in response to the society's demands. The ZAs are tools for environmental sciences related researches around a structuring element (river, landscape, town, ...). They ensure a national service of observation and research in environment in an international scientific framework.
